Dedication

Preface

Chapter 1: Introduction to Autodesk Revit Architecture 2016

Introduction to Autodesk Revit Architecture
Autodesk Revit Architecture as a Building Information Modeler
Basic Concepts and Principles
 Understanding the Parametric Building Modeling Technology
 Terms Used in Autodesk Revit Architecture
 Creating a Building Model using Parametric Building Elements
 Visibility/Graphics Overrides, Scale, and Detail Level
 Extracting the Project Information
 Creating an Architectural Drawing Set
 Creating an Unusual Building Geometry
 Flexibility of Creating Special Elements
 Creating Structural Layouts
 Working on Large Projects
 Working in Large Teams and Coordinating with Consultants
Starting Autodesk Revit Architecture 2016
User Interface
 Invoking Tools
 Title Bar
 Ribbon
 Application Frame
 Status Bar
 View Control Bar
 Options Bar
 Type Selector
 Drawing Area
 Project Browser
 Keyboard Accelerators
 Properties Palette
Dialog Boxes
Multiple Document Environment
Interoperability of Autodesk Revit Architecture
Building Information Modeling and Autodesk Revit Architecture 2016

Autodesk Revit Architecture Help
Using the Revit Architecture 2016 Help
Worksharing Using Revit Server
Working with BIM 360
Sharing Models with BIM 360

Chapter 2: Starting an Architectural Project

Introduction
Starting a New Architectural Project
Project Units
 Length Unit
 Area Unit
 Volume Unit
 Angle Units
 Slope Unit
 Currency Unit
 Mass Density Unit
Snaps Tool
 Dimension Snaps Area
 Object Snaps Area
 Temporary Overrides Area
Saving a Project
 Saving the Project File
 Using the Save Tool
Configuring Global Settings
 General Tab
 User Interface Tab
 Graphics Tab
 File Locations Tab
 Rendering Tab
 Check Spelling Tab
 SteeringWheels Tab
 ViewCube Tab
 Macros Tab
Closing a Project
Exiting Autodesk Revit Architecture
Opening an Existing Project
 Opening an Existing Project Using the Open Tool
Model Display Tools
 Using the Zoom Tools
 Using the Orient Options
 Navigation Tools
 Other Display Options
Tutorial 1 Apartment 1
Tutorial 2 Club
Self-Evaluation Test
Review Questions

Exercise 1 Apartment 2
Exercise 2 Elevator and Stair Lobby

Chapter 3: Creating Walls

Introduction
Creating a Building Project
Sequence of Creating a Building Model
 Understanding Wall Types
 Creating Architectural Walls
Working With Stacked Walls
 Creating a Stacked Wall
Adding Interior Walls
Adding Wall Sweeps and Wall Reveals
 Wall Sweeps
 Wall Reveals
Tutorial 1 Apartment 1
Tutorial 2 Club
Tutorial 3 Apartment 1 - Interior Walls
Tutorial 4 Club - Interior Walls
Tutorial 5 Office - Stacked Wall
Self-Evaluation Test
Review Questions
Exercise 1 Apartment 2
Exercise 2 Elevator and Stair Lobby
Exercise 3 Club-Interior Walls

Chapter 4: Using Basic Building Components-I

Introduction
Adding Doors in a Building Model
 Adding Doors
 Understanding Door Properties
 Adding a Door to a Wall
Adding Windows in a Building Model
 Adding Windows
 Understanding Window Properties
 Adding a Window to a Wall
Doors and Windows as Wall Openings
Openings in the Wall
Tutorial 1 Apartment 1
Tutorial 2 Club
Self-Evaluation Test
Review Questions
Exercise 1 Apartment 2
Exercise 2 Elevator and Stair Lobby
Exercise 3 Club - Hall 2

Chapter 5: Using the Editing Tools

Introduction

Creating a Selection Set

Selecting Multiple Elements

Isolating Elements Using the Selection Box

New

Selecting Elements Using Advanced Tools

Restoring the Selection

Using the Filter tool

Moving and Copying Elements

Moving the Elements by Changing the Temporary Dimensions

Moving the Elements by Dragging

Moving the Elements by Dragging the End-Joint Components

Moving the Elements by Selecting and Dragging

Using the Move Tool

Using the Copy Tool

Trimming and Extending Elements

Using the Trim/Extend to Corner Tool

Using the Trim/Extend Single Element Tool

Using the Trim/Extend Multiple Elements Tool

Cutting and Pasting Elements

Cutting Elements

Copying Elements to the Clipboard

Pasting Elements from the Clipboard

Rotating Elements

Mirroring Elements

Mirroring Elements using the Mirror - Pick Axis Tool

Mirroring Elements using the Mirror - Draw Axis Tool

Creating an Offset

Creating an Array of Elements

Linear Array

Radial Array

Matching Elements

Aligning Elements and Working with Constraints

Deleting Elements

Splitting Element

Splitting with Gap

Splitting Faces

Grouping Element

Creating Groups by Selecting Elements in the Project Views

Creating Groups Using the Group Editor

Creating a Detail Group

Creating Model and Attached Detail Groups

Placing Groups

Swapping Groups

Modifying Groups

Excluding Elements from a Group

Saving and Loading Groups

- Converting Groups to Linked Models
- Deleting Groups
- Creating Similar Elements
- Pinning and Unpinning Elements
- Scaling Elements
- Using Diagnostic Tools
- Measuring Distance between References and Along an Element
 - Selecting Elements Using the Element ID
- Assemblies
 - Creating Assemblies
 - Editing Assemblies
 - Creating Assembly Views and Sheets
- Tutorial 1 Apartment 1
- Tutorial 2 Club
- Tutorial 3 Office- Assembly Views
- Self-Evaluation Test
- Review Questions
- Exercise 1 Apartment 2
- Exercise 2 Club
- Exercise 3 Elevator and Stair Lobby
- Exercise 4 Office

Chapter 6: Working with Datum Plane and Creating Standard Views

- Introduction
- Working with Levels
 - Understanding Level Properties
 - Adding Levels
 - Modifying Level Parameters
- Hiding Elements in a View
 - Controlling the Visibility of Levels
- Working with Grids
 - Creating Grids
 - Modifying Grids
 - Grid Properties
 - Customizing the Grid Display
 - Controlling the Visibility of Grids
- Reference Planes
- Work Planes
 - Setting a Work Plane
 - Controlling the Visibility of Work Planes
- Working with Project Views
 - Viewing a Building Model
 - Visibility/Graphic Overrides of an Element
 - Visibility/Graphic Overrides of an Element Category
 - Making Elements Transparent
 - Using the Temporary Hide/Isolate Tool
 - Plan Views

Elevation Views
 Section Views
 Using the Scope Box Tool
 Tutorial 1 Apartment 1
 Tutorial 2 Club
 Self-Evaluation Test
 Review Questions
 Exercise 1 Apartment 2
 Exercise 2 Elevator and Stair Lobby

Chapter 7: Using Basic Building Components-II

Introduction
 Creating Architectural Floors
 Sketching the Floor Boundary
 Creating Roofs
 Creating Roofs by Footprint
 Creating Roofs By Extrusion
 Modifying Roof Properties and Editing Shapes
 Shape Editing Tools for Structural Floors
 Modify Sub Elements
 Add Point
 Add Split Line
 Pick Supports
 Reset Shape
 Creating Ceilings
 Creating an Automatic Ceiling
 Sketching a Ceiling
 Using the Pick Walls Method
 Modifying a Ceiling
 Rooms
 Adding Rooms
 Calculating Room Volumes
 Cutting Openings in a Wall, Floor, Roof, and Ceiling
 Joining Walls with Other Elements
 Using the Attach Top/Base and Detach Top/ Base Tools
 Tutorial 1 Apartment 1
 Tutorial 2 Club
 Self-Evaluation Test
 Review Questions
 Exercise 1 Apartment 2
 Exercise 2 Elevator and Stair Lobby

Chapter 8: Using Basic Building Components-III

Introduction
 Using Components in a Project
 Adding Components

- Adding Stairs
 - Adding Stair By Component
 - Converting a Stair Component to a Sketch
 - Adding Stairs by Sketching Runs
 - Adding Stairs by Sketching the Boundary and Riser Lines
 - Modifying Stairs Properties
- Adding Railings
 - Adding Railings by Sketching the Path
 - Modifying Railing Properties
 - Modifying Railing Joints
- Adding Ramps
- Using Curtain Systems in a Project
 - Creating a Curtain Wall Using the Wall: Architectural Tool
 - Creating a Curtain Wall by Picking Lines
 - Creating a Curtain System on a Face
 - Adding Curtain Grids
 - Modifying Curtain System Panels
 - Adding Doors and Awnings to a Curtain System
 - Adding Mullions
- Copying Elements from One Level to Another
 - Using the Pasting Tools
- Tutorial 1 Apartment 1
- Tutorial 2 Club
- Tutorial 3 Elevator and Stair Lobby
- Self-Evaluation Test
- Review Questions
- Exercise 1 Apartment 2

Chapter 9: Adding Site Features

- Introduction
- Working with Site Features
 - Creating a Toposurface
 - Creating Topographical Subregions
 - Splitting a Topography
 - Merging Toposurfaces
 - Creating a Topography Using Imported Data
- Setting the Site Properties
- Adding Property Lines
 - Sketching Property Lines
 - Creating Property Lines Using Distances and Bearings
 - Creating Building Pads
- Adding Site Components
- Adding Parking Components
- Adding Labels to Contours
- Tutorial 1 Site Plan
- Self-Evaluation Test
- Review Questions

Exercise 1 Site Plan

Exercise 2 Museum Site Plan

Chapter 10: Using Massing Tools

Introduction

Understanding Massing Concepts

Creating the Massing Geometry

Creating a Massing Geometry in the Family Editor

Editing a Massing Geometry in the Family Editor

Creating Cuts in a Massing Geometry Using the Family Editor

Placing the Massing Geometry in a Project

Creating the In-Place Mass in a Project

Massing in Conceptual Design Environment

Interface of the Conceptual Design Environment

Creating Masses in Conceptual Design Environment

Creating Building Elements from the Massing Geometry

Using Building Maker Tools

Creating Walls by Selecting Faces

Creating Floors by Selecting Faces

Creating Roofs by Selecting Faces

Creating Curtain Systems by Selecting Faces

Controlling the Visibility of a Massing Geometry

Adding other Building Elements

Creating Families

Creating In-Place Families

Creating Families Using Standard Family Templates

Tutorial 1 Office Building 2

Tutorial 2 Architectural Column

Self-Evaluation Test

Review Questions

Exercise 1 Office Towers

Exercise 2 Stadium

Chapter 11: Adding Annotations and Dimensions

Introduction

Adding Tags

Tagging Elements by Category

Tagging All Elements in a View

Tagging Treads or Risers

Room Tags

Room Separation

Tagging Rooms

Keynotes

Loading Keynote File

Placing Keynotes

Adding Keynote Legends

- Adding Symbols
- Adding Dimensions
 - Types of Dimensions
 - Dimensioning Terminology
 - Adding Permanent Dimensions
 - Adding Alternate Dimension Units
 - Baseline and Ordinate Dimensions
 - Editing Dimensions
 - Controlling the Display of Tick Marks and Dimension Arrows
 - Creating Linear Wall Dimensions Automatically
- Adding Spot Dimensions
 - Placing a Spot Dimension
 - Modifying Spot Dimension Properties
 - Converting Temporary Dimensions to Permanent Dimensions
- Tutorial 1 Apartment 1
- Self-Evaluation Test
- Review Questions
- Exercise 1 Club
- Exercise 2 Elevator and Stair Lobby
- Exercise 3 Building 1

Chapter 12: Creating Project Details and Schedules

- Project Detailing in Autodesk Revit Architecture
- Creating Details Using a Building Model
 - Callout View
 - Displaying the Callout View
 - Modifying Callout View Properties
 - Adding Details to the Callout View
- Crop Regions
 - Model Crop Region
 - Annotation Crop Region
- Creating Drafted Details
 - Creating a Drafting View
 - Drafting a Detail
 - Line Style Settings
 - Using Line Weights
 - Using Line Patterns
- Adding Text Notes
 - Creating Text Notes
 - Editing Text Notes
 - Creating a Model Text
- Revision Clouds
 - Creating the Revision Cloud
 - Adding a Revision Tag
- Using Schedules in a Project
 - Generating a Schedule
 - Exporting Schedule to Excel Sheet
 - Creating a Legend View

Tutorial 1 Apartment 1 - Callout View
Tutorial 2 Apartment 1 - Schedules
Tutorial 3 Road Section Detail
Self-Evaluation Test
Review Questions
Exercise 1 Club - Drafted Detail
Exercise 2 General - Sketch Detail
Exercise 3 Club - Schedules

Chapter 13: Creating Drawing Sheets and Plotting

Introduction
Creating Drawing Sheets
 Adding a Drawing Sheet to a Project
 Adding Views to a Drawing Sheet
 Modifying View Properties
 Panning the Viewports Added to the Sheet
 Adding Schedules to a Drawing Sheet
 Modifying a Building Model in a Drawing Sheet
Creating Guide Grid
Duplicate Dependent Views
 Creating Dependent Views
 Adding Matchline to Dependent Views
 Adding Views to Sheet
 Adding View Reference
Printing in Autodesk Revit Architecture
 Printing Drawing Sheets and Project Views
 Selecting and Modifying the Printer Settings
 Using the Print Setup Dialog Box
 Previewing the Print Setup
Tutorial 1 Apartment 1
Self-Evaluation Test
Review Questions
Exercise 1 Club
Exercise 2 Urban House

Chapter 14: Creating 3D Views

Introduction
Three-Dimensional (3D) Views
 Creating Orthographic Views
 Dynamically Viewing Models Using Navigation Tools
 Using the Orient Tool
 Generating Perspective Views
 Locking and Unlocking 3D Views
 Using the Section Box
Tutorial 1 Apartment 1
Tutorial 2 Club
Self-Evaluation Test

Review Questions
Exercise 1 Apartment 1
Exercise 2 Office Building 1
Exercise 3 Office Building 2
Exercise 4 Hotel Building

Chapter 15: Rendering Views and Creating Walkthroughs

Rendering in Revit Architecture
 Rendering Workflow
 Introduction to Materials
 Applying Lights
 Using Decals and Entourages
 Rendering Settings
Creating a Walkthrough
 Creating the Walkthrough Path
 Editing and Playing the Walkthrough
 Recording a Walkthrough
Autodesk 360 | Rendering
 Rendering in Cloud
 Accessing Render Gallery
Tutorial 1 Apartment 1
Tutorial 2 Office Building 2
Self-Evaluation Test
Review Questions
Exercise 1 Club
Exercise 2 Apartment 1 - Night View
Exercise 3 Hotel Building - Walkthrough

Chapter 16: Using Advanced Features

Introduction
Creating Structural Components
 Creating Structural Walls
 Creating Structural Columns
 Adding Structural Beams and Braces
 Cutting Openings in Beams, Braces, and Columns
Generating Multiple Design Options
 Generating Design Options for a Project
 Presenting Design Options
Using Area Analysis Tools
 Area Schemes
 Area Plans
 Area Schedules
Color Schemes
 Creating Color Schemes
 Modifying Color Scheme
Masking Regions
 Adding Masking Regions to a Project

Adding Masking Region to a Detail Family	
Adding Masking Regions to a Model Family	
Creating Displaced Views	
Using Project Phasing Tools	
Understanding Phasing Concepts	
Linking Building Models and Sharing Coordinates	
Linking or Importing Models	
Linking Revit Models	
Nested Linked Models	
Converting Linked Models to Groups - Binding Links	
Managing Links	
Including Elements of Linked Models in Schedules	
Applying the Color Schemes of the Host Model to Rooms and Areas of the Linked Models	
Copying Linked Model Elements	
Worksharing Concepts	
Worksharing Using Workset Tools	
Process of Worksharing	
Saving Methodology in Worksharing	
Element Ownership Concepts	
Purging Unused Element Families	
Transferring Project Standards	
Organizing the Project Browser	
Generating Shadows	
Revit Architecture Solar Studies	
Generating Still Solar Study	
Creating an Animated Solar Study	
Point Cloud	
Inserting a Point Cloud File	
Point Cloud Visibility	
Using a Point Cloud File in a Project	
Revit Architecture Interoperability	
Interoperability with Autodesk 3ds Max and Autodesk 3ds Max Design	
Interoperability with Google SketchUp	
Publishing Tips in Revit Architecture 2016	
Tutorial 1 Apartment 1	
Tutorial 2 Apartment Complex	
Self-Evaluation Test	
Review Questions	
Exercise 1 Apartment 2	
Exercise 2 Apartment Complex
